

VANLUK MG100 BENEFITS

1. Tailored fit MG100 maintains Airseal around the penetration
2. Water does not sit on MG100.
3. Penetration can be adjusted in or out after MG100 fitted and before weatherseal applied.
4. Water tracking along the penetration is repelled by a tailored fit and edge of butyl tape and repelled by weatherseal at cladding line.
5. MG100 acts as PEF backing rod substitute allowing weatherseal to perform as per spec.
6. Friction seal deals with larger cavities.
7. All materials of the highest quality and appraised for durability.
